## **Data Flow Diagrams:**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## **User Stories**

Use the below template to list all the user stories for the product

| User Type | Functional<br>Requirement<br>(Epic) | User Story<br>Number | User Story / Task   | Acceptance criteria                               | Priority | Release  |
|-----------|-------------------------------------|----------------------|---|---|----------|----------|
| Customer  | Registration                        | USN-1                | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard               | High     | Sprint-1 |
|           | Acknowledgement                     | USN-2                | As a user, I will receive confirmation email once I have registered for the application                   | I can receive confirmation email & click confirm  | High     | Sprint-1 |
|           | Ticket creation                     | USN-3                | As a user, I can create new tickets with descriptions of my query.  | I can create a ticket and ask my query.           | Medium   | Sprint-2 |
|           | Forget password                     | USN-4                | As a user, I can reset my password by this option in case I forgot my password.                           | I can change the password                         | Medium   | Sprint-1 |
|           | Login                               | USN-5                | As a user, I can login into the application by entering email & password                                  | I can access my account                           | High     | Sprint-1 |
|           | Dashboard                           | USN-6                | As a user, I am able to see all the tickets raised by me.   | I get all information in the dashboard            | Low      | Sprint-1 |
| Agent     | Login                               | USN-1                | As an agent, I can login to the application by entering the email id and password.                        | I can access my account                           | High     | Sprint-2 |
|           | Forget password                     | USN-2                | As an agent, I can reset my password in case I forget my password   | I can change my password                          | High     | Sprint-2 |
|           | Dashboard                           | USN-3                | As an agent, I can able to see all the tickets raised by the customers                                    | I can see all the tickets and clarify the queries | High     | Sprint-2 |
| Admin     | Login                               | USN-1                | As a admin, I can login to the application by entering email id and password                              | I can access my account                           | High     | Sprint-3 |
|           | Agent creation                      | USN-2                | As a admin, I can able to create agent for the customers to solve the queries                             | I can create agents                               | High     | Sprint-3 |
|           | Forget password                     | USN-3                | As a admin, I can reset my password by this option in case I forgot my password                           | I can change password                             | Medium   | Sprint-3 |
|           | Assigning Agent                     | USN-4                | As a admin, I can assign agents to the customers who raised the tickets.                                  | I can assign agents to the customers              | High     | Sprint-3 |
